

Would you also like to offer patients a Holter ECG directly in your practice?

Dear Doctor

Who is Sana Alliance and what do they offer you?

Sana Alliance AG, headquartered in Zurich, is a medical company founded by a team of experts from the medical industry and Swiss FMH cardiologists to improve the cardiology services for Swiss doctors and their patients.

At Sana Alliance, we combine the expertise of our Swiss FMH cardiologists with the state-of-the-art technology of our cooperation partner Cortrium ApS. Its wireless 3-channel C3+ Holter monitor allows you to offer your patients high-quality and quick diagnosis.

You don't waste time physically referring your patients. You can set up your patients directly in the initial treatment and put the Cortrium C3+ Holter on them. Your patients will receive the diagnosis from you shortly, without long waiting lists.

**Are you also interested in this service?
Then you can find more information on how to get started here:**

How does this service work?

In the software that comes with the product, you create the patient for a Holter analysis and put the monitor on him. This process only takes only 2-3 minutes, as it is cablefree. After completion, the Holter is removed, connected to your practice computer and the raw ECG data is uploaded to the software.

Within 2 working days you will receive the final report, including diagnosis and treatment recommendations for your patients, if necessary.

How do I get to know the true promise of this service?

Any doctor can offer this service! All you have to do is log in to our website using this link www.sana-alliance.ch. Here you will find the conditions for our service. If you agree, you will receive your device within 5 days. The installation of the software and a short onboarding (approx. 10 minutes in total) is either done by one of our employees on site or online.

How do I benefit from this as a doctor?

With no initial investment and a short onboarding, you can offer your patients a better service and at the same time bill your service with the respective insurance company. The devices and software are designed in such a way that the Holter-ECG is easy and quick to use. This saves you and your practice team time.

You will be reimbursed for the installment and removal of the Holter ECG (code: 170130, 62.77 points for 2025) per Holter analysis. The only cost is the rental of the device, which is 15 CHF per month¹⁾.

¹⁾ The terms and conditions for the rental (incl. warranty) apply. Optional additional insurance for Loss & Damage cases +13 CHF per month
