Trusted by doctors

500,000+

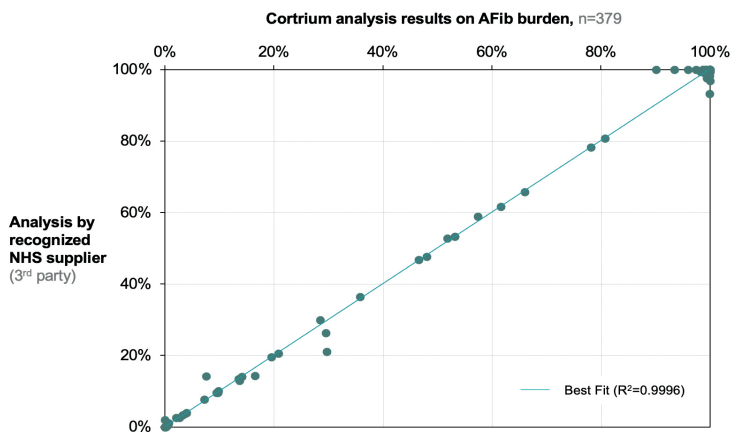

ECG reports delivered to date

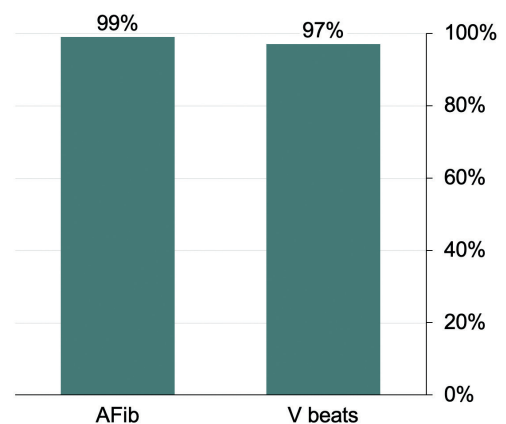

3,000+

Doctors using our service daily

Validated quality

Correlation in comparative study with gold-standard external ECG analysis service ($R^2=0.9996$)

Sensitivity based on externally validated annotation database by internationally recognized Certified Cardiac Technicians, n=300 patient recordings

Certified medical device

Our medical devices are certified as Class IIa under the Medical Device Regulation (MDR).

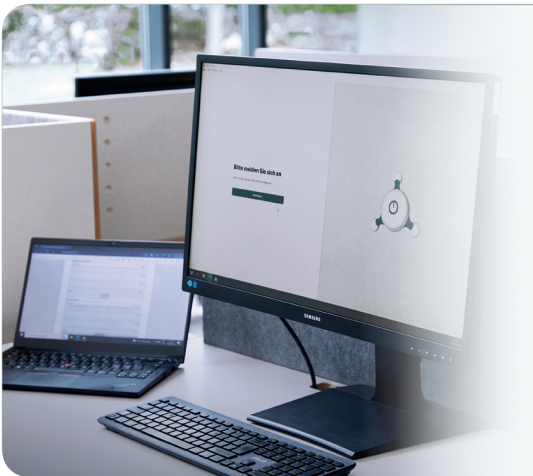

How it works – 3 simple steps

Each ECG report is verified by our inhouse cardiac specialists. Combined, they have more than 300 years of hospital cardiology experience. Their skills are constantly refined through daily conferences and senior expert review processes – ensuring quality reports, delivered within just 2 working days.

1. Set-up

- Set-up the patient data in the Cortrium Apex software
- Shave the chest to the extend required
- Place the C3w with the 3 electrodes on the patient

2. Order

- Once the device is returned, connect the C3w monitor to the PC
- Upload the data through the Cortrium Apex software and click order report

3. Download

- Download the analyzed ECG report in the Cortrium Apex software
- Counsel and/or treat the patient accordingly

Our best Holter yet

Listening to our customers' feedback, we have improved our Holter monitor, to deliver the best version yet to you and your patients

	Previous version	C3w
